- ## SUMMARY

Dedicated and passionate web developer with a Bachelor's degree in Computer Applications, currently pursuing a Master's degree in the same field. With over 1.5 years of experience as a Full Stack Laravel Developer at a startup, I have successfully delivered high-quality projects for large organizations. Proficient in Laravel, core PHP, HTML, CSS, jQuery, Bootstrap, and other essential web development tools. A quick learner who adapts to new concepts and environments with ease. Enthusiastic about utilizing my skills to contribute to the growth and success of a company. Known for strong problem-solving skills and a commitment to creating innovative and efficient web solutions.

- ## ACADEMIC PROJECTS

1. Beauty Parlour Management System   https://developersaurabh.in/bpms/   **Jan 2023 – Mar 2023**
Admin & User Id- 7488944009   **Password- 1234**

In this an admin could keep track of customer records, customer appointments, send instant approvals or rejections, manage enquiries, update user appointments, and print invoices for appointments. The system allows users to visit and get information about the beauty parlour and their services, team, contact, sign up, login, book appointments, and manage their appointments, profile, and password. The system was developed using HTML, CSS, Bootstrap, jQuery, PHP, and MySQL.

2. My Personal Website   https://www.developersaurabh.in/   **March 2023**

Here you can find a comprehensive representation of my professional identity. This website is a reflection of my experiences, skills, and achievements, featuring several pages that allow you to explore my background, expertise and capabilities. The system was developed using HTML, CSS, Bootstrap, jQuery, and PHP.

- ## PROFESSIONAL PROJECTS

1. Order Credit Release (Truflo Pipes)   **June 2023 – July 2023**

Developed an internal application for Truflo Pipes to streamline order processing. The application interfaces with SAP and other systems to retrieve data, performs necessary calculations, and presents it to various users. It includes a multi-level user hierarchy for order approval, ensuring accuracy and compliance. Upon unanimous approval, the application seamlessly integrates with SAP for order fulfilment.

2. Audit Management System (Somany Impresa)   **Aug 2023 – Oct 2023**

This an internal Audit Management System for Somany Impresa Group. This comprehensive application facilitated the management of the audit process across the organization. Implemented features to streamline audit workflows, assign tasks, track progress, and generate reports. Collaborated with stakeholders to ensure the system met organizational requirements and compliance standards.

3. VMS & CRS (Somany Impresa)   **Nov 2023 – Mar 2024**

This internal project for the Somany Impresa Group, designed to manage visitor and cab requisitions, is divided into two main parts: Visitor Management and Cab Requisition. It supports multiple users and levels of user roles, enabling them to request and manage the approval flow for visitors and cabs. The application is location and company-based, suitable for use in multiple plants within the Somany Impresa Group.

4. Test Certificate (Arjas Steel)   **Apr 2024 – May 2024**

This internal application, hosted on a private server, is designed to generate test certificates based on test results. Requirements are received through Excel files, followed by multiple calculations and multi-level approvals. Once the requirements are processed, an Excel sheet is generated and sent for approval. Subsequently, users input test data values for each record. Finally, the application generates a test certificate in PDF format based on a standard template.

5. One Login (Somany Impresa)   **May 2024**

This internal project for the Somany Impresa Group is designed to manage access to all web applications within the organization. Through this application, any Somany Impresa employee can log in and access other company websites and web applications seamlessly. User authentication is handled through Microsoft Azure AD, allowing direct access to other applications without additional authentication steps. Users can filter and search through a list of company applications and visit any of them directly.

6. Ticketing Tool (PMTS - Powermech)   **June 2024**

This is a standard ticketing tool or helpdesk application. Users can raise tickets, which are then assigned by an admin to a consultant for resolution. The application includes real-time chat and file-sharing features, allowing multiple users to chat and share files simultaneously.
